

XOANONS® Dispersing agent

Model number

XOANONS®WE-D265R

Specification

Composition	High M.W. block style copolymer solution with pigment affinity groups
Appearance	Yellowish to brownish red clear liquid
Solvent	Dibasic ester
Active substance	45%
Density	1.04-1.08g/ml(25 ± 1)°C
Viscosity	6-30s(Tu-4 viscometer)(25 ± 0.2)°C
Flash point	> 100°C

Note: This datasheet is intended to give typical results, not standard. Subject to COA.

Application system

Solvent-based paint and ink

Properties

- Provide good color rendering for organic pigments. Good black tone and viscosity-reduction in dispersing high pigment carbon black.
- It's suitable thermoplastic acrylic resin system.

Incorporation

Should be incorporated to the mill base before pigments adding.

Suggest addition

Inorganic pigment	1-10%
Organic pigment	15-35%
Carbon black	30-100%

Storage stability

Keep intact 24 months in original package. Products beyond the storage period may continue to be used after inspection. The container must be closed immediately after use.

package

25KG / 180KG
